

Benny Frisella

Dallas, Texas, 75252 | (512) 420-7987 | benny.j.frisella@gmail.com | [LinkedIn](#) [GitHub](#) [Tableau Public](#)

TECHNICAL SKILLS

Programming: Python, R, Java, C++, MapReduce / Spark via Docker
Analysis Tools: Power BI, Tableau, Excel, AI/ML in Python
Databases: MySQL, AWS
Certifications: IBM Data Science Professional

EDUCATION

Bachelor of Science in Data Science, Minor: Business Intelligence and Analytics Graduated December 2025
The University of Texas at Dallas, Richardson, TX **GPA 3.56**

Associate of Science in Physics Graduated December 2022
Austin Community College, Austin, TX **GPA 3.88**

RECENT RELEVANT COURSES

Computational Methods for Data Scientists | Advanced Big Data Analytics | Data Visualization | Database Systems |
Introduction to Machine Learning | Mathematical Statistics | Multivariate Calculus

ACADEMIC PROJECT EXPERIENCE

[UTD Capstone](#), Data Science Capstone August 2025 – December 2025

- Led development of an Office of Technology Commercialization dashboard for UT Dallas, creating an automated ETL pipeline with automated DAX reporting and updates informed by research across 20+ university interviews.

[Predicting Diabetes](#), Introduction to Machine Learning January 2025 – May 2025

- Improved data quality through cleaning, outlier treatment, and custom imputation, enhancing model performance.
- Performed exploratory data analysis (EDA) using feature standardization, correlation analysis, and feature importance metrics to identify key predictive relationships.
- Developed and optimized machine learning models including LDA, QDA, Random Forest, and XGBoost, improving predictive accuracy on non-linear healthcare data.

[Empowering Women](#), Foundations of Business Intelligence January 2024 – May 2024

- Aggregated data from 100+ sources on USDA website into a Tableau density map demonstrating the disparities between female/male producers in each county across the US. This was the only project in the class to be absorbed by the USDA for future work.

[Database Design](#), Data Structures and Algorithms August 2023 – December 2023

- Engineered an end-to-end relational database normalized to 3NF to model comprehensive real-world business operations, utilizing complex queries, views, and recursive hierarchies.
- Programmatically synthesized and populated thousands of constraint-respecting data records using Python and the Faker library, maintaining absolute referential integrity across complex multi-stage operational tables.

WORK EXPERIENCE

Service Technician, Mid-America Apartments, Austin, TX May 2015 – August 2024

- Maintained a 100% customer satisfaction rating over a 9-year tenure, recognized by the Regional Vice President for operational excellence and zero escalations while managing 24/7 on-call property operations every other week.

LEADERSHIP EXPERIENCE

Back End Lead, UT Dallas, Dallas, TX August 2023 – December 2025

- Coordinated technical deliverables and architecture for cross-functional development teams; ensured 100% on-time project completion and high-quality code integration.
